SAN FRANCISCO, Calif. physicians in the San Francisco Bay Area.

This partnership provides Brown & Toland's 335,000 patients greater access to high-quality, convenient care at all 10 Dignity Health-GoHealth Urgent Care locations in the Bay Area throughout San Francisco and San Mateo counties. The partnership will provide a more effortless and connected urgent care experience for Brown & Toland patients, physicians and other caregivers.

"Through our partnership with Dignity Health-GoHealth Urgent Care, our patients have more choice when it comes to accessing healthcare treatment options," said Kelly Robison, CEO of Brown & Toland Physicians. "By combining the strengths of our physician network with Dignity Health-GoHealth Urgent Care, we are ensuring that our patients have access to high quality and convenient urgent care services in the San Francisco Bay Area, every day."

Dignity Health-GoHealth Urgent Care will also provide Brown & Toland Physicians' patients a much more affordable and convenient alternative to expensive emergency room visits for their non-life threatening healthcare needs. All Dignity Health-GoHealth Urgent Care locations, which are open seven days a week, including weekends and holidays, will provide a seamless continuum of care, including same-day and next-day access to specialists.

"Dignity Health-GoHealth Urgent Care centers provide the right level of care in the right setting, in a convenient location," said Todd Strumwasser, MD, senior

vice president of operations for Dignity Health in the Bay Area. “Access to high-quality urgent care is very important, and we are pleased to welcome Brown & Toland patients.”

“We are very excited about working more closely with Brown & Toland Physicians to help care for their Bay Area patients and to support their physicians and clinical teams,” said Chuck Kruger, president of Dignity Health-GoHealth Urgent Care.

“Our new partnership will allow our growing organizations to create a more integrated approach to care within the communities we both serve, focused on population health management and clinical innovation.”
